

ReCopper
your water stream.
Refresh
your cash flow.

Discharge compliance can be a heavy burden on any business that works with copper. Handling toxic sludge has traditionally been an expensive and labor-intensive process, but now there's a better way. ElectraMet's ReCopper process includes an automated system that meets or exceeds discharge limits. What's more, you can actually recover valuable copper and other metals from your wastewater stream and recycle it back into your manufacturing process—with a significantly smaller equipment footprint.

Visit electramet.com to discover the ReCopper solution.

Meet discharge
compliance—
for up to
90% less.

Wastewater treatments are often expensive, labor-intensive, and produce significant waste. Worst of all, many are unreliable when it comes to the one job they have to do: meeting compliance.

With ElectraMet, you get a consistent, reliable, and sustainable solution that meets discharge compliance, with operating costs as much as 90% lower than what you may be paying now.

Turn your
waste stream
into a
revenue stream.

If you have copper, chromium, or other metals in your industrial wastewater stream, you could be recovering valuable metals—and creating a new revenue stream—for up to 90% less than the cost of your current wastewater treatment processes. With ElectraMet, you get a sustainable solution that enables you to create a new and profitable circular economy.

Take a big step in reducing your wastewater **footprint.**

As if processing wastewater wasn't enough of a burden, most treatment systems take up a lot of space. Now there's something better: sustainable wastewater solutions from ElectraMet that fit into significantly smaller spaces, automate labor-intensive tasks, and reduce your operating cost.

Take the first step by visiting electramet.com, or contact us today.

You handle the
finish.

We'll handle the
wastewater.

Whether you're a metal finisher, electronics manufacture, electroplater or battery recycler, wastewater compliance isn't the core of your business. ElectraMet can help you do it for less, and free up time for you and your team to focus on what you do best. You'll get an automated, sustainable solution that costs less, eliminates labor-intensive processing tasks, and takes up less of your site's valuable space.
